Modern, cool and unpretentious was the objective for **GONTERMAN CONSTRUCTION** with this dreamy entertaining space that feels like a small boutique hotel. When open, the Western Window Systems pocket doors increase the usable square footage and allow cool ocean breezes to sweep through this Huntington Beach home. [gontermanconstruction.com]

Before any design work was done on this house at The Strand at Headlands, **BRAD COOK OF GENOVA CONSTRUCTION** walked the dirt lot many times over many days to find the perfect location and elevation for this primary bedroom. The panoramic view makes this one a stunner. [genovacd.com]; (@genovaconstruction)
